

# CAD CAM Dentistry

Get on-board or get left behind!

Sat.  
May 19  
2018

This course is designed for practitioners who want to be involved in the provision of high quality CAD CAM restorations. It will cater for all levels of experience.

- Help develop modern treatment plans by better understanding the current CAD CAM materials and systems that are available.
- Explain and depict the most conservative approaches to achieve the best aesthetic and functional outcomes for your patients.
- Explain the best bonding protocols for the various CAD CAM materials – this opens up the potential for the consideration of other more conservative approaches to rehabilitate teeth.
- Explore what CAD CAM materials should be considered, in the various situations that clinicians face on a daily basis.
- Explain how “Digital Smile Design” & CAD CAM co-exist with the aim of achieving superior results.
- Explore how CAD CAM facilitates easier and more aesthetic results with the anterior restorations of choice – from wax-up to finished restorations.
- Potentially expand the spectrum of usage for the experienced CAD CAM user.
- Highlight tips, tricks and pitfalls in CAD CAM dentistry

## Dr Paul Gorgolis

Dr Paul Gorgolis lectures and conducts hands-on courses in ceramics, composites & CAD CAM dentistry. He has been a clinical lecturer and

tutored the final year dental students at UWA. He is a Fellow of the International Congress of Oral Implantologists. In London (1997), he developed three of the UK's first, and hugely successful, multi-disciplinary general & specialist practices where patients could be comprehensively managed, and treated “under one roof”.

He currently practices, within a multi-disciplinary practice, in Wembley Downs, Perth WA.
